# **Super Bowl 50 Weather Situational Awareness**

In collaboration with local, state and federal partners, the San Francisco Bay Area National Weather Service (NWS) Weather Forecast Office (WFO) will provide enhanced decision support services to Emergency Management partners in support of their public safety efforts around the National Football League's (NFL) Super Bowl 50 and events leading up to the NFL championship game being held at Levi's Stadium in Santa Clara, California.

Today's briefing, generated by the San Francisco Bay Area NWS WFO, will serve as a broad weather outlook for the greater San Francisco Bay Area over the next week. An update to this outlook is scheduled for Thursday, January 28th. Additional forecast briefings will be disseminated based on partner request and/or weather demands.

## **Weather Summary**

Aside from light rain over the North Bay today, generally dry weather conditions are expected over the San Francisco Bay Area through Thursday. By late in the week, a weather system is forecast to bring widespread precipitation back to the region that will likely linger into the upcoming weekend. Longer range forecast models continue to indicate an increased probability of a more active, wetter weather pattern across region for the first week in February.

## **7 Day Area Forecast for the Greater San Francisco Bay Area**

**Today:** Mostly sunny, with highs mainly in the lower 60s. Calm wind becoming north northwest around 6 mph.

**Tonight:** Partly cloudy, with lows mostly in the middle 40s. Calm wind becoming east northeast around 5 mph.

**Tuesday:** Mostly sunny, with highs mainly in the lower 60s. East northeast wind between 4 and 6 mph.

**Tuesday Night:** Partly cloudy, with lows mostly in the middle 40s. Northeast wind between 3 and 6 mph.

**Wednesday:** Mostly sunny, with highs mostly in the middle 60s. East northeast wind between 3 and 6 mph.

**Wednesday Night:** Partly cloudy, with lows mainly in the middle 40s.

**Thursday:** Mostly sunny, with highs mostly in the middle 60s.

**Thursday Night:** Mostly cloudy, with lows mostly in the upper 40s.

**Friday:** A chance of rain. Mostly cloudy, with highs mostly in the middle 60s.

**Friday Night:** A chance of showers. Mostly cloudy, with lows mainly in the lower 50s.

**Saturday:** A chance of showers. Mostly cloudy, with highs mainly in the lower 60s.

**Saturday Night:** A chance of rain. Mostly cloudy, with lows mostly in the upper 40s.

**Sunday:** A chance of showers. Partly sunny, with highs mostly in the middle 50s.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

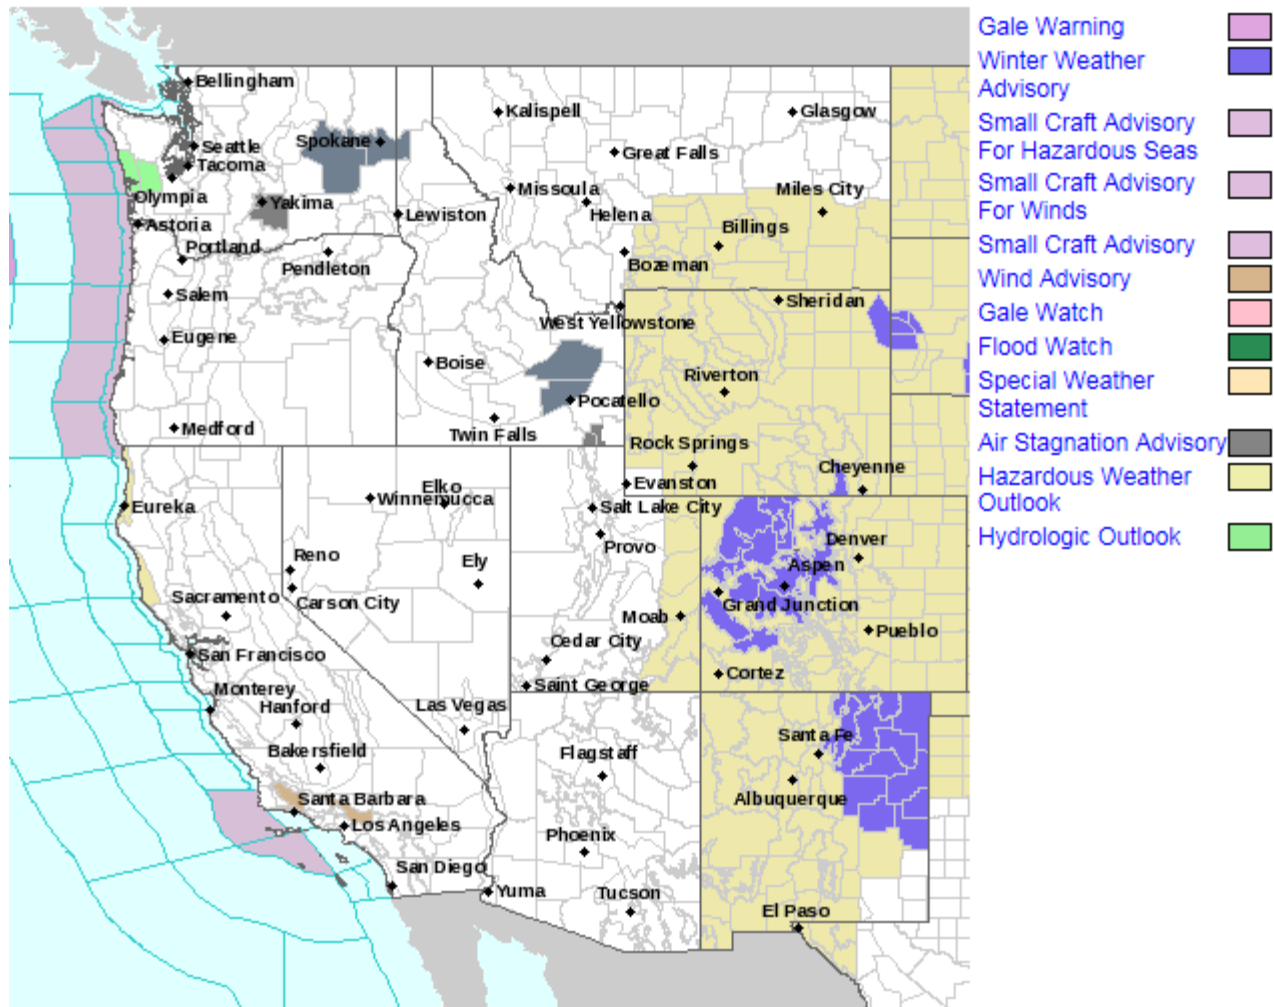

### **NORTHERN CALIFORNIA**

A weak high pressure ridge is along the coast and will hold there through Wednesday. Northern California will be partly sunny to partly cloudy with temperatures normal or a few degrees above. Thursday the ridge will weaken and the jet stream will be back over Northern California. This will put us back in a weather pattern where frontal systems move across the north state every 24 to 36 hours. Rain will move into the area Thursday afternoon with periods of rain or showers through Sunday. Snow levels Thursday and Friday will be 5000 to 6000 feet but will drop to 3500 to 4500 feet by Saturday. The frontal systems will be preceded by gusty south winds.

### **SOUTHERN CALIFORNIA**

A ridge of high pressure aloft will persist through the work week and will peak in strength on Thursday and Friday. Weak to occasionally moderate offshore flow will also continue. The strongest offshore flow for San Luis Obispo and Santa Barbara counties was today, while Los Angeles and Ventura counties will see the strongest winds tonight into Tuesday. We will be posting a low- grade borderline wind advisory for the wind-prone areas, with peak gusts generally in the 35 to 45 mph in the windiest locations. These winds may take much of the morning to work down to the coasts and valley on Tuesday with a marginal marine inversion in place. Interior areas will cool noticeably on Tuesday thanks to the offshore flow. While coastal and valley areas will warm. Expecting the Ventura coast and Malibu areas to see the warmest conditions with highs in the mid to upper 70s. After tomorrow, temperatures will generally increase everywhere as the ridge strengthens and offshore flow weakens. There will be some variability of course, especially for areas that see wind one day and not the next. Night temperatures will increase as well with the warming air mass, and frost will be less prevalent each day. Sky conditions will generally be clear, with a few periods of high clouds streaming through.

# CAL OES 2014 DROUGHT

## Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.
